

NxStage Users

Don't Dialyze Alone!

Although you may dialyze at home you don't have to be isolated. NxStage Users is a patient only group of people who use the NxStage System One Dialysis System. It is open to all patients and caregivers. It is independent of NxStage Medical, Inc. and all dialysis centers. NxStage Users is more than a discussion group; it is proactive in its support and advocacy for the NxStage patient community.

The group is dedicated to being a true "family" where all people are treated equally and with the utmost respect and provides a comfortable setting for sharing our mutual interests as we travel the same road of home hemodialysis with the NxStage System One. Our members are both dialysis veterans and newcomers from all parts of the country.

Why not join a group where you have the freedom to say what you want and learn from others doing the same treatment. Why not share what you have learned so others can benefit? Together we can make each other's life more fulfilling. And you won't have to feel like you're all alone!
